Geochimica et Cosmochimica Acta

List of Referees, List of Contents,
Subject Index, and Author Index
Volume 55, 1991

EDITORIAL ACKNOWLEDGMENTS

We thank our Associate Editors and reviewers whose dedication and expertise continue to enable us to maintain the high standards of *Geochimica et Cosmochimica Acta*. These individuals are identified below in order to recognize the important contribution that they have made to the advancement of geochemistry during the past year.

In addition, we thank our editorial staff: Renée Davis, Assistant Editor; Charlotte Levesque and Kimberly Sherlock, Manuscript Managers; and our Editorial Assistants: David Faure, Beth Ina, and Todd Lekan. We are especially grateful to Teresa Mensing and Erik Hagen who served as Executive Editors when G.F. was out of the country. We also introduce to you at this time Wanda Davis who is the new Subscription Manager of the Geochemical Society.

All of the above are members of team that has brought you *Geochimica et Cosmochimica Acta* during 1991. It was, in all respects, a very good year for our journal and we thank everyone very sincerely for their continued support.

In conclusion, we acknowledge the excellent working relationship we have enjoyed with the administrators and technical experts at Tapsco Inc. and at Lancaster Press whose professional skill is reflected by the elegant appearance of our journal. We also thank James Gilgunn-Jones and Peter Henn of Pergamon Press Inc. for their continued support of the editorial office.

Gunter Faure
Executive Editor

E. Lee Mobley
Managing Editor

LIST OF CONTENTS

JANUARY

Letters

A. BELONOSHKO and S. K. SAXENA: A molecular dynamics study of the pressure-volume-temperature properties of supercritical fluids: I. H_2O 381

P. SUNDARARAMAN and C. J. BOREHAM: Vanadyl 3-nor C_{30}DPEP: Indicator of depositional environment of a lacustrine sediment 389

R. A. CREASER, D. A. PAPANASTASSIOU, and G. J. WASSERBURG: Negative thermal ion mass spectrometry of osmium, rhenium, and iridium 397

Differences between Antarctic and Non-Antarctic Meteorites edited by C. Koeberl

C. KOEBERL and W. A. CASSIDY: Differences between Antarctic and non-Antarctic meteorites: An assessment 3

M. E. LIPSCHUTZ and S. M. SAMUELS: Ordinary chondrites: Multivariate statistical analysis of trace element contents 19

H. TAKEDA: Comparisons of Antarctic and non-Antarctic achondrites and possible origin of the differences 35

M. M. GRADY, I. P. WRIGHT, and C. T. PILLINGER: Comparisons between Antarctic and non-Antarctic meteorites based on carbon isotope geochemistry 49

L. SCHULTZ, H. W. WEBER, and F. BEGEMANN: Noble gases in H-chondrites and potential differences between Antarctic and non-Antarctic meteorites 59

M. A. VELBEL, D. T. LONG, and J. L. GOODING: Terrestrial weathering of Antarctic stone meteorites: Formation of Mg-carbonates on ordinary chondrites 67

D. W. MITTLEFEHLDT and M. M. LINDSTROM: Generation of abnormal trace element abundances in Antarctic eucrites by weathering processes 77

M. MIYAMOTO: Differences in the degree of weathering between Antarctic and non-Antarctic meteorites inferred from infrared diffuse reflectance spectra 89

W. A. CASSIDY and R. P. HARVEY: Are there real differences between Antarctic finds and modern falls meteorites? 99

G. R. HUSS: Meteorite mass distributions and differences between Antarctic and non-Antarctic meteorites 105

Other Articles

A. R. FELMY and J. H. WEARE: Calculation of multicomponent ionic diffusion from zero to high concentration: I. The system Na-K-Ca-Mg-Cl-SO_4-H_2O at 25°C 113

A. R. FELMY and J. H. WEARE: Calculation of multicomponent ionic diffusion from zero to high concentration: II. Inclusion of associated ion species 133

B. P. BOUDREAU: Modelling the sulfide-oxygen reaction and associated pH gradients in porewaters 145

D. C. MCCORKLE and G. P. KLINKHAMMER: Porewater cadmium geochemistry and the porewater cadmium:$\delta^{13}C$ relationship 161

I. M. SAMSON and A. E. WILLIAMS-JONES: C-O-H-N-salt fluids associated with contact metamorphism, McGerrigle Mountains, Quebec: A Raman spectroscopic study 169

D. J. VELINSKY and G. A. CUTTER: Geochemistry of selenium in a coastal salt marsh 179

J. D. BLUNDY and B. J. WOOD: Crystal-chemical controls on the partitioning of Sr and Ba between plagioclase feldspar, silicate melts, and hydrothermal solutions 193

M. R. CARROLL and E. M. STOLPER: Argon solubility and diffusion in silica glass: Implications for the solution behavior of molecular gases 211

S. J. G. GALER and S. L. GOLDSTEIN: Early mantle differentiation and its thermal consequences 227

S. H. BOTTRELL and B. W. D. YARDLEY: The distribution of Fe and Mn between chlorite and fluid: Evidence from fluid inclusions 241

M. E. FLEET and W. E. STONE: Partitioning of platinum-group elements in the Fe-Ni-S system and their fractionation in nature 245

M. B. YUNKER, R. W. MACDONALD, B. R. FOWLER, W. J. CRETNEY, S. R. DALLIMORE, and F. A. MCLAUGHLIN: Geochemistry and fluxes of hydrocarbons to the Beaufort Sea shelf: A multivariate comparison of fluvial inputs and coastal erosion of peat using principal components analysis 255

A. G. DOUGLAS, J. S. SINNINGHE DAMSTÉ, M. G. FOWLER, T. I. EGLINTON, and J. W. DE LEEUW: Unique distributions of hydrocarbons and sulphur compounds released by flash pyrolysis from the fossilised alga *Gloeocapsomorpha prisca*, a major constituent in one of four Ordovician kerogens 275

G. A. GOODFRIEND: Patterns of racemization and epimerization of amino acids in land snail shells over the course of the Holocene 293

M. DEB, J. HOEFS, and A. BAUMANN: Isotopic composition of two Precambrian stratiform barite deposits from the Indian shield 303

A. M. STUEBER and L. M. WALTER: Origin and chemical evolution of formation waters from Silurian-Devonian strata in the Illinois basin, USA 309

J. CRUSIUS and R. F. ANDERSON: Immobility of ^{210}Pb in Black Sea sediments 327

J. P. HOGAN and A. KRISHNA SINHA: The effect of accessory minerals on the redistribution of lead isotopes during crustal anatexis: A model 335

M. C. JOHNSON, M. J. RUTHERFORD, and P. C. HESS: Chassigny petrogenesis: Melt compositions, intensive parameters, and water contents of Martian (?) magmas 349

T. R. IRELAND, A. J. FAHEY, and E. K. ZINNER: Hibonite-bearing microspherules: A new type of refractory inclusions with large isotopic anomalies 367
